Project description

Our web portal gives students the chance to know more about the courses they choose and professors, their feedback at any moment. We collect feedback and rating for professors and courses from the students. This helps students to choose the courses and instructors to their liking.

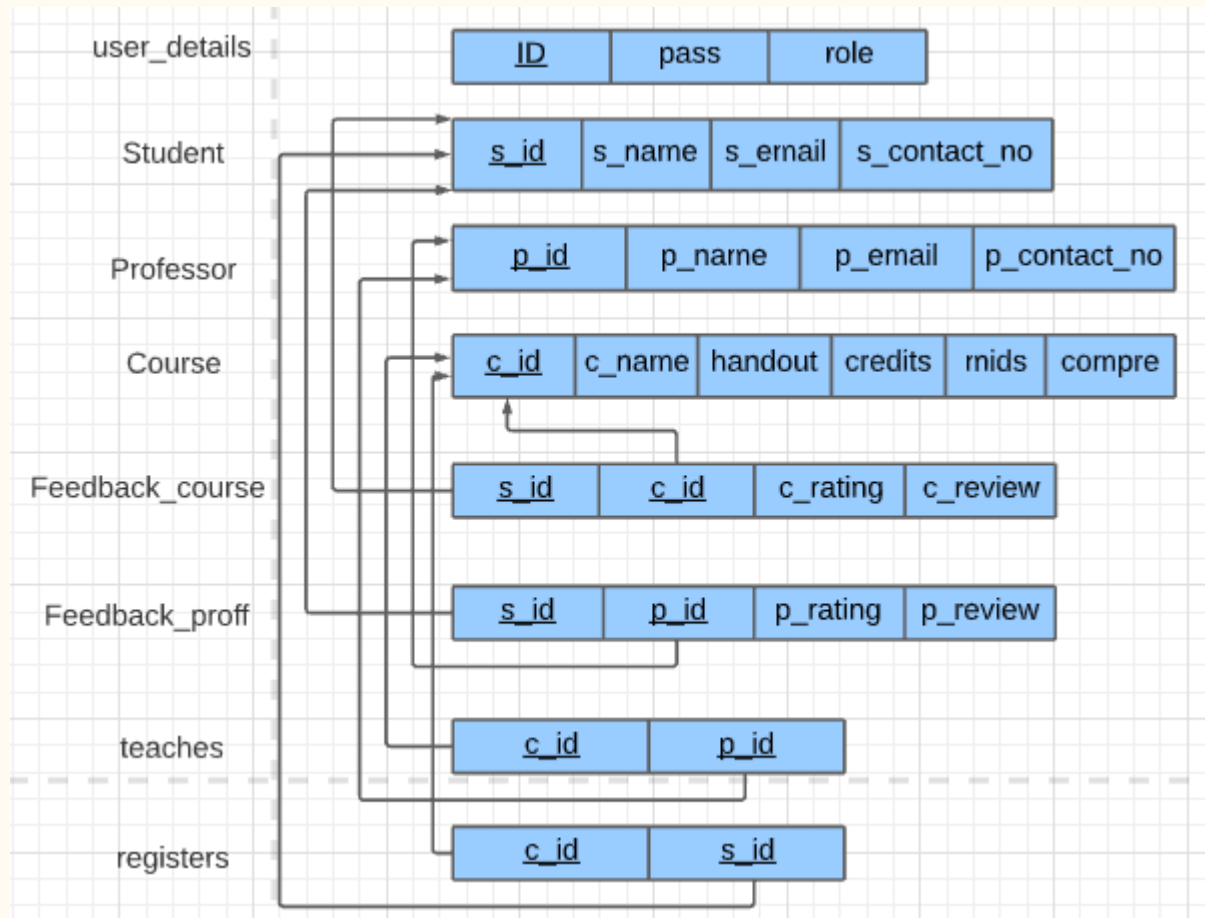

Key Features

- There are 3 different user interfaces. Student, professor and admin.
- Professors can view feedback and rating.
- Professors can know enrolled students.
- Professors can post regarding handouts and test dates.
- Enrolled students can view information about courses like test-dates.
- Overall rating for a course and professor can be known by any student.
- Professors are assigned to courses by the administrator.

Tables

Constraints from website

1. System checks ID and role and then, the account is created only after verification.
2. User can only register once.
3. Student/professor has to provide few details after creating an account in website.
4. Student has to enroll into courses.

Thank You
